

Do your homework! Learning mathematics is an active process - you cannot succeed just by listening or by watching someone else do problems. Time (at least 2 hours outside of class for every in-class hour) spent on going over your notes, reading your textbook and working exercises will help you clarify ideas and methods and discover points you don't understand. Check your answers. (Answers to the odd-numbered problems are in the back of the book.) While doing your work outside of class, make notes about anything that you are having trouble understanding. ***Be ready to ask questions about homework (or anything else) at the beginning of class, but do not ask questions about problems you have not tried.*** Work with a classmate or two. Talk and listen as well as write when you study. Additional problems, such as classroom handouts, will also be assigned frequently.

If you miss a class, either get in touch with a classmate or go to the course website at http://www.montgomerycollege.edu/faculty/~jriseber/public_html/182home.htm to learn the current assignment and whether any important announcements were made in class. You can also use the course website to access other websites.

Section	Page	Assignment
5.3	p. 377	9 - 35 odd, 43, 45, 53, 56
5.5 (a)	p. 395	1 - 21 odd, 27, 31, 33
(b)	p. 395	37 - 47 odd, 53, 58, 61
5.6	p. 401	1 - 21 odd, 41, Read Ex. 6 on p. 400 and then do 33, 34
5.7 (a)	p. 408	1, 2, 3, 5, 6, 7, 8
Appendix G	p. A53	1, 5, 7, 11, 13, 16, 17, 21, 23, 24, 26
5.7 (b)	p. 408	25, 27
5.8	p. 414	1 - 11 odd, 17, 19, 21
5.9	p. 425	1, 3, 7, 9, 11, 13, 15, 17, 23, 27
4.5	p. 305	1 - 4, 5 - 27 odd, 31, 33, 35, 39, 51, 52
5.10	p. 436	1, 3, 5, 7, 11 - 19 odd, 23, 25, 29, 31, 33, 35, 49
